DEPARTMENT OF CONSTRUCTION SCIENCE & MANAGEMENT
ADVANCED BUILDING MATERIALS / ASSISTANT OR ASSOCIATE PROFESSOR

Advanced Materials Research

Clemson University’s Department of Construction Science and Management is seeking applications for a tenure track assistant/associate professor to teach and conduct research. In addition to teaching experience in a construction related environment, it is desired that the applicant have a special research emphasis in advanced building materials. Research conducted by this faculty member will further the aims of Clemson’s Restoration Institute by providing focus on the development and application of advanced building materials. It will unite perspectives from the disciplines of advanced material science and construction procedures and management around restoration initiatives.

The ideal candidate for this position should have a PhD in Civil Engineering, Structural Engineering, Advanced Materials or an allied field, and have five or more years of practical experience in the development and application of building materials. An MS with extensive laboratory and/or state of the art field construction experience and a PE license would be considered in lieu of the advanced degree.

To apply, please send a letter of interest with a current resume to
