The Landscape Architecture Program is seeking to fill two tenure-track positions at the assistant or associate professor level beginning August 15, 2006. Women and minority candidates are encouraged to apply. Review of materials will begin immediately and continue until a suitable candidate is identified. To assure consideration, complete application materials should be on hand by November 1, 2005. Candidates must hold at least one accredited degree in landscape architecture and a terminal degree in landscape architecture or another related field of study.

The program is seeking candidates who are outstanding teachers and researchers. Because high quality design has and will continue to be a major focus at Clemson, experience in design and/or in teaching design are essential. Professional accreditation will also be a considered a plus. Additionally, landscape architecture faculty have developed emphasis areas including community growth and change, restoration (historical, cultural, and ecological), and healthy environments. Given the importance of those focus areas, we are also seeking candidates who have a clear interest and/or track record in one or more of the following scholarly arenas: social / behavioral research, participatory design, health and design, urban issues, community design, and sustainable environments. Candidates with a background in general computer applications or GIS as related to any of those areas of research may be given additional consideration.

New faculty members will be expected to be actively involved in the Master of Landscape Architecture Program and may play a role in the new Ph.D. in Environmental Design and Planning. Other responsibilities include student advising, assistance with program and university accreditation, and participating in additional aspects of program, department, college and university affairs including all aspects of the governance of the department, college and university when called upon.

The Landscape Architecture Program is an LAAB accredited 5-year bachelor degree program with five full-time and two part-time faculty members. Established in 1986 the program usually has between 120 and 130 BLA students. The first and second professional MLA programs opened this year and will soon hold 35 students total. Faculty members are active in practice and research—including landscape ecology, historic preservation, design theory, community design, and landscape architectural history—as well as public and professional service. The program has direct links to the SC chapter of ASLA and practitioners in the state and region. The Department also includes a graduate City and Regional Planning program with six faculty members and 35 students, a new graduate program in real estate development, and a Master of Science in Historic Preservation taught jointly with the College of Charleston and housed in Charleston. Additional information about the program with links to the department may be found at our web page: http://www.clemson.edu/caah/landscapearchitecture/.

The college and department have established the Center for Community Growth and Change, the Center for Real Estate Development, the latter with the cooperation of the College of
Business and Behavioral Science, to search and develop opportunities for applied research and contracted community studies. The newly formed Restoration Institute at the university level also provides a rich array of interdisciplinary collaborative projects for students and faculty.

The Department also is involved in the direction of the South Carolina Design Arts Partnership (SC-DAP), a partnership between the University, the South Carolina Arts Commission, and the Downtown Development Association. SC-DAP provides community design service throughout South Carolina. The Design Arts partnership has brought a number of service learning opportunities to the department over the last several years. Faculty members are also active in the Mayor's Institute for Community Design. Program students have opportunities to study for one semester off campus in Genoa, Italy, Barcelona, Spain, Istanbul, Turkey or Charleston, SC.

The program is part of the College of Architecture, Arts and Humanities. The School of Design and Building includes the disciplines of planning, architecture, landscape architecture, construction science and management, real estate development, and historic preservation. The former dean of the college, James Barker, FAIA, is President of Clemson University and the current dean, Janice C. Schach, FASLA, is a faculty member of the department and is past president of the American Society of Landscape Architects and the Council of Educators in Landscape Architecture.

Clemson University, the land-grant institution of South Carolina, is located mid-way between Atlanta and Charlotte within two hours from either city. Clemson is at the rural edge of the Greenville-Spartanburg MSA of about 1,000,000 population. South Carolina is the home of many historic communities such as Charleston and of two nationally prominent tourist destinations - Hilton Head Island and Myrtle Beach. Mountain, lake, river, and coastal environments in the region are plentiful with the University located at the foothills of the Blue Ridge Mountains and on the shore of Lake Hartwell.

The adjacent City of Clemson has a population over 15,000. About 17,000 students attend Clemson University. Clemson was named by Time Magazine as the outstanding public university for 2000-2001. Clemson has a goal of becoming ranked in the nation's top-20 public universities by 2010.

Applicants should submit a letter of application, curriculum vitae, portfolio and the names of three references with mail and e-mail addresses and telephone numbers to Daniel Nadenicek, Chair, Search Committee, Department of Planning and Landscape Architecture, 121 Lee Hall, Box 340511, Clemson University, Clemson, SC 29634-0511, (e-mail submissions via attached Word file to dnadeni@clemson.edu. Salary will be competitive.
