DEPARTMENT OF BIOENGINEERING
Clemson University

Clemson University’s Dept of Bioengineering is seeking applications for one tenure-track junior faculty position in areas including cellular and molecular biology applied to regenerative medicine, bioimaging, and biomechanics to complement our well-recognized research and education program in biomaterials. We are seeking candidates possessing a Ph. D. degree in Bioengineering, Molecular Biology, Biochemistry, Electrical / Mechanical Engineering, or related disciplines. Additional post-doctoral research experience is desirable. Clemson University has selected Biomedical Sciences and Biotechnology as one of the emphasis areas and is dedicated to foster growth in this area. The successful candidate will be expected to develop an active externally funded research program, initiate collaborative research with Greenville Hospital System, University Medical Center, and have a strong commitment to excellent teaching. Applicants should send their CV, a statement of research and teaching interests, and the names of at least three references to Prof. Naren Vyavahare, Search Committee Chair, Department of Bioengineering, 501 Rhodes Research Center, Clemson University, Clemson, SC 29634-0905. Email inquiries may be sent to: narenv@clemson.edu. Applications will be evaluated until the position is filled; however, to be assured full consideration, applications must be received by November 30, 2005.

Clemson University is an AA/EEO employer and does not discriminate against any person or group on the basis of age, color, disability, gender, national origin, race, religion, sexual orientation, or veteran's status. Minorities, women, and persons with disabilities are specifically encouraged to apply.
