The Department of Animal and Veterinary Sciences at Clemson University is seeking applicants for the position of Comparative Animal Physiologist with education and experience in male reproductive physiology. The position is being advertised at the Assistant Professor rank with a 9-month tenure-track appointment. The responsibilities of the position include teaching, research and student advisement. The successful applicant will be expected to teach courses in physiology (e.g., endocrinology, reproduction) as it relates to production farm animals. Creation of a viable and active research program supported with external grants and providing opportunities for graduate student education is required. A portion of time each semester will be devoted to student advisement in support of the overall academic success of both undergraduate and graduate students.

The faculty of the Department of Animal and Veterinary Sciences has adopted a research emphasis area in reproductive technology (e.g., embryo transfer and cloning). The concept is to interactively conduct research with production farm animals in such a manner as to utilize the skills and experiences of all faculty members in the department for the successful conception, gestation, birth, growth and maturation of these animals. This information will then be translated into knowledge for current schemes employed in modern farming operations. The department has numerous laboratories and access to five animal farms for both teaching and research experiences that support the emphasis goals. Interactions with faculty members in other departments on campus are encouraged and provide avenues for collaborative work in genomics, proteomics and bioinformatics.

Application Procedures and Deadlines  
Direct all applications or inquiries to:

Dr. Tom Scott, Professor  
Clemson University Animal and Veterinary Sciences Dept.  
123 Poole Agricultural Center Clemson, SC 29634-0311  
Phone 864-656-4027       Fax 864-656-3131
